Washington 25, D.C.	Federal Security Building, South 4th and D Streets, S.W.

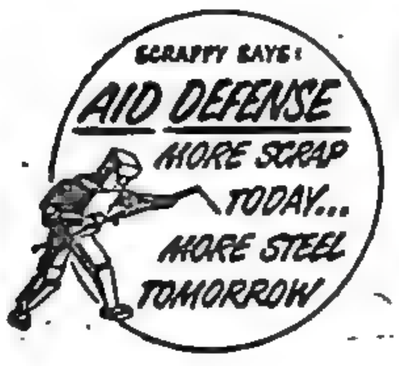
✪ Address correspondence for this station to the Medical Officer in Charge of the Los Angeles Station.

Search your plant for iron and steel scrap . . . help our country to get enough steel

It takes scrap . . . to make steel.

Multiply the amount of iron and steel scrap in your plant by 2 . . . that's the amount of steel that could be made if that scrap were salvaged.

Today, there's not enough scrap coming in from normal sources to keep steel mills and foundries producing at capacity.



YOUR JOB IS CLEAR
—GET IN THE SCRAP
IN ORDER TO KEEP STEEL COMING

NON-FERROUS SCRAP IS NEEDED TOO!

Home of "WSB"

Long-ears is not on our payroll

Nor is the prestidigitator who conjures him out of a topper. No miracles by magicians in tails at Harborside! Just good, hard, shirt-sleeves application to your distributional concerns by men well seasoned in their jobs.

This, plus our very convenient location and modern equipment, gives you the decided edge you want in your New York operations. Here—under one big roof—are 43.5 acres of floor space, for dry- and cold-storage (free and bonded), offices, showrooms, manufacturing, processing. Here you get pool car service, transshipment, distribution. Fireproof construction, sprinklers, our private fire department, earn low insurance rates.

Harborside—world's greatest rail-water terminal—is directly opposite Cortlandt Street, Manhattan. Five minutes to Holland Tunnel and trunk highways. Direct connections with Pennsylvania Railroad, and with all other lines and steamships, by lighterage; 31-car placement. Descriptive folder on request.
